

# Newspaper Kite

Take 2 double pages of a Tabloid news paper then tape them together as shown in drawing no. 1

Next measure 180mm in from each corner as in drawing no. 2. Then draw a line to join them up. Next cut along that line to give you the outside shape of your kite.

Next tape all around the edge and across the kite to make it strong, as in drawing No.3

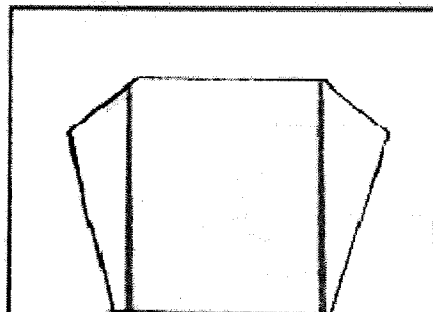

The next part is to take 2 more double pages and roll them in to very tight tubes as shown in Drawing no.4.

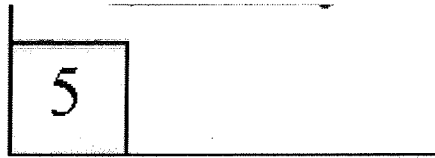

The tubes are the sticks for your kite, so please roll them as tight as you can.

Now tape the tubes to the kite as shown by the blue lines in drawing no. 5

Almost finished.

Take 1.5 metres of string and fix it to the point of the kites shown in drawing no. 6.

Then take another 1.5 metre of string and fix it to the bottom corners of the kite also shown in no.6.

[Click here for Safety rules](#)

This is it.

Just add a 5 metre tail to the loop at the bottom and off you go.
