COOPERATIVE EXTENSION

WHERE FOODS COME FROM MATCH GAME

Directions

- Make cards using 2 different colors, (as shown) one for the original food, and another for the food that comes from it. Have students match the card from the first stack with what it comes from in the second stack. (See photo 1)
- When children are more advanced the cards can be turned over and matched to create more of a challenge. (See photo 2)

**** For an added challenge cards can be made with all backs in one color.
